### FISHING TRIP INFORMATION

#### TRIP ITINERARY & INFORMATION

Welcome to Maine Guided Trips and thank you for your interest in our fishing trips. Since 1996, we have been introducing people to the inland and coastal beauty of the state of Maine. We offer a large selection of recreational opportunities that can accommodate just about any skill level, and schedule.

#### TRIP OVERVIEW

This trip is the perfect way to experience fishing in Maine. Whether your goal is to spin cast, or fly fish, we will take you to our local favorite spots for bass, trout, and salmon. During the trip you will see magnificent views, experience Maine's freshwater lakes and streams, learn about Maine history, natural history, or all the above. This trip will exceed your aspirations.

**DURATION:** Four hours. Departing locations will be sent to you prior to departure. Please note that your trip return time is estimated and that certain variables beyond the control of Maine Guided Trips may prevent your group from returning on time. Trips returning late occur infrequently but should be considered a realistic possibility.

**GROUP SIZE:** Max of twelve participants with one guide

**LOCATION:** Various locations, Maine

#### CHECK-IN INFORMATION

This trip departure depends on the group and the guide. We will inform you before departure as to where to meet and send you a location via the Maps app. where the guide will meet you, and the fishing will commence from there. [Maine fishing licenses are required and can be purchased online here for anyone 16 years or older.](#)

If we are parking in Acadia National Park, it is required to get a park pass which is good for seven days and allows entrance to all of the park. [The link to purchase a pass is here.](#)

Layer up, layer down! Being able to adjust layers in response to activity level, air and body temperatures, you will stay comfortable throughout your trip. Choose fabrics that dry quickly, insulate if wet, and wick moisture away from the skin. Materials such as Capilene, wool, polypro, and fleece work well to wick moisture away and insulate. Nylon and Gore-Tex provide an excellent outer shell to repel wind and rain.
